

Objective

This document explains the standard process followed by the T-team to investigate pricing discrepancies between IDeaS G3 RMS and external selling systems.

Step 1: Understand the Client Concern

Carefully review the case comments and identify:

- Affected room types
- Affected rate codes/products
- Affected dates
- Selling systems involved
- Nature of the issue (pricing mismatch, missing rates, upload issue, etc.)

Example Case: 03358066

Client Concern:

"Dear Team,

Good morning.

I would like to understand why the pricing for ST1K and VL1KD shown on IDeaS differs from what is displayed online. Could you please explain the reason for this discrepancy?

Thank you in advance for your support."

Step 2: Check Decision Configuration

Navigate to:

Configure → Decision Configuration

Verify:

- Which selling systems are configured for uploads
- Whether decisions are being uploaded successfully
- Whether the selling system is active

Examples of selling systems:

- SynXis
- Infor
- HTNG
- AnyHTNG
- Opera
- Opera Cloud

This helps identify where G3 is sending decisions.

Edit Property Data Excluded Dates **Decision Configuration** Data Loads Process Data Message Health Automation Manager Core Settings Inbound Integration Questionnaire Outbound Special Care Sync Flag Tool

Destination	Delivery Type	Upload Type
Infor	Daily BAR	Differential
Infor	Hotel overbooking	Differential
Infor	LRV At Room Type	Full
Infor	Room type overbooking	Differential
SynXis - 63639 - 10BED1	Daily BAR	Differential
SynXis - 63639 - 10BED1	LRV At Room Type	Full

Step 3: Verify Vendor Integration Mapping

Vendor Integration Applicable Systems

Vendor Integration mapping is applicable for:

- SynXis
- Infor
- AnyHTNG
- HTNG
- Other third-party integrations

Vendor Integration mapping is NOT applicable for:

- Opera
- Opera Cloud

Validation Steps

If Vendor Integration is applicable:

- Verify whether all room types are mapped correctly.
- If a room type is missing in the Vendor Integration module, G3 will NOT send rates to that room type.

Example:

For Case 03358066:

- No room types were mapped in Vendor Integration.
- Therefore, G3 sent rates to all room types by default.

Save Cancel

Add Rate Code Mapping

Rate Code	Vendor Rate Code
No data found.	

Step 4: Check Room Configuration and Pseudo List

Navigate to:

Configure → Room Configuration

Validation Points

1. Pseudo Room Check

If a room type is configured under the Pseudo List:

- G3 will NOT send decisions to that room type.

2. Capacity Check

Verify room type capacity:

- Room types must have valid capacity configured.
- If capacity = 0, no decisions/rates will be generated for that room type.

Step 5: Verify Pricing Configuration

If the issue is related to:

- Linked products
- Missing pricing
- Incorrect pricing uploads

Then navigate to:

Configure → Pricing Configuration

Validation Points

Verify:

- Linked products are configured correctly
- "Active" checkbox is enabled
- "Upload" checkbox is enabled

Note:

- Base products are enabled by default.

IDEaS | G3 RMS **Configure/Decisions / Pricing Configuration** Mandarin Oriental Hotel Group - MOMRK - Mandarin Oriental Marrakech(Cap.: 65) 11:00:16 WEST Wed 27-May-2026

Display Order	Product Name	Description	Product Type	Active	Upload	Centrally Managed
1	BAR	Best Available Rate	Primary Priced	☒	☒	☐

Step 6: Perform Full Decision Push

If all validations are correct but pricing mismatch still exists:
Perform a Full Decision Upload.

Navigate to:

Configure → Decision Configuration

Upload Options

1. Upload Now

- Triggers immediate full decision upload.

2. Upload at BDE

- Use when “Upload Now” is greyed out.

Important Note

“Upload Now” becomes unavailable approximately 1 hour before BDE/IDP processing.

Step 7: Monitor Processing

After initiating the upload:

- Monitor processing status from the Monitoring Dashboard.
- Ensure all processing completes successfully.

Step 8: Download and Verify Decision Files

After processing completion, download the generated decision files and compare them with G3 pricing.

Tools Used**HTNG**

Use:

<https://rpwq2x0j-5005.inc1.devtnnls.ms/>

OHIP

Use:

<https://ohip-internal.ideasrms.com/s3-explorer>

Opera

Use:

- Postman
- Download decision files manually

Step 9: Compare Pricing

Cross-check:

- Pricing Screen in G3 RMS
- Decision Files
- Selling System Pricing

Verify:

- Rates
- Room Types
- Dates
- Rate Codes

If G3 pricing and decision files match:

- Issue is likely outside G3
- Ask client to verify with the downstream selling system/vendor

Step 10: Website Pricing Validation Clarification

Sometimes clients mention that the pricing displayed on the website is incorrect or does not match the pricing in G3 RMS.

Important Note

From the Pricing Team side:

- We DO NOT validate pricing directly on the client website.
- Our scope is limited to validating:
 1. Pricing Screen in G3 RMS
 2. Generated Decision Files
 3. Decision Upload Status

If the pricing in:

- G3 RMS
- Decision Files
- Uploaded Decisions

are all correct, then the issue is most likely related to:

- Selling System processing
- Channel distribution
- Website display logic
- Vendor-side transformation

In such cases, advise the client to coordinate with the respective vendor/selling system support team.

Step 11: Validate Pricing Configuration for Ceiling, Offset, and Supplements**If the client concern is related to:**

- Offset not applied correctly
- Supplement not applied correctly
- Extra Adult pricing mismatch
- Extra Child pricing mismatch
- Ceiling/Floor values not reflecting correctly

Then navigate to:

Configure → Pricing Configuration

Validation Points

1. Ceiling/Floor Validation**Verify:**

- Ceiling values are configured correctly
- Floor values are configured correctly
- Pricing boundaries are active and valid

2. Offset Validation**Verify:**

- Offset values are configured correctly
- Offset type is accurate
- Linked product mapping is correct
- Upload is enabled

3. Supplement Validation**Verify:**

- Extra Adult supplement values
- Extra Child supplement values
- Occupancy supplements
- Product-level supplement configuration

Step 12: Verify Decision File for Supplements and Offsets

After validating Pricing Configuration:

- Download the generated decision file.
- Verify whether G3 is sending the correct:
 - Offset values
 - Supplement values
 - Extra Adult pricing
 - Extra Child pricing

Important Validation

Match:

- Pricing Configuration values
- Decision File values
- Uploaded decisions

If the decision file contains the correct values:

- Inform the client that G3 is successfully uploading the expected pricing, offsets, and supplements.

Example Response

“We verified the Pricing Configuration and corresponding decision files. The configured offset and supplement values for Extra Adult and Extra Child pricing are correctly reflected in the generated decision files and are being successfully uploaded from the G3 side.”

Sample Client Response

Hello Riccardo,

Greetings from IDEaS!

Thank you for raising a case via the IDEaS Community Portal.

We understand your concern regarding the pricing discrepancy for room types ST1K and VL1KD between IDEaS and the online display.

We verified the pricing in G3 RMS and cross-checked it against the corresponding decision files.

Please note that from the IDEaS side, the decisions were successfully uploaded to both SynXis and Infor. However, we do not have visibility into the onward distribution or processing of the decisions within those systems.

Verification in G3 RMS and Decision File

We reviewed the rates configured in G3 RMS and compared them with the rates reflected in the generated decision files. The values are matching as expected.

Validation for Date – 05 Oct 2026

Rate Code: Daily BAR

1. Room Type: ST1K
Rate in G3 RMS: 2305.00000
2. Room Type: VL1KD
Rate in G3 RMS: 2205.00000

The same rates were successfully transmitted to SynXis and Infor through the generated decision files.

Supporting Documents Attached

1. Pricing_in_Decision_File_ST1K
2. Pricing_in_Decision_File_VL1KD
3. Pricing_in_G3
4. 1530_0046.xml
5. 1530_0046_SynXis.xml

Next Steps

As the rates are correctly configured and successfully uploaded from the G3 side, we kindly request you to coordinate with the SynXis/Infor support team to verify whether the transmitted decisions have been successfully processed and reflected on their end.

Best Regards,
Ajay Gandhi
IDEaS – A SAS Company
